PROFILE

Backend engineer, 3+ years in production fintech. I build and scale high-availability Node.js/TypeScript systems serving 100k+ users: resilient REST APIs, event-driven microservices (RabbitMQ), containerized infrastructure (Docker), automated CI/CD (Jenkins), and observability (Grafana). Track record: cut production Docker images 50%, lifted app performance 20% via query optimization + caching. Open to relocation (DACH/Nordics/Singapore).

EXPERIENCE

Back End Developer — Traders Family · Aug 2023 – Present

North Jakarta, Indonesia · fintech

- **Performance & infrastructure:** lifted app performance **20%** (query optimization + caching, **100k+ users**) and cut production Docker image size **50%**.
- **CI/CD & observability:** built Jenkins pipelines (Docker) and Grafana dashboards for proactive detection + high availability.
- **APIs & event-driven:** engineered resilient RESTful APIs (Node.js + TypeScript) and RabbitMQ microservices powering core functionality.
- **Modernization & security:** led refactor of key projects to TypeScript; bcrypt + JWT auth; comprehensive unit/integration tests.

Web Developer — Chingu · Jul 2023 – Sep 2023

Remote (cohort program)

- Built responsive data-visualization tool (NASA API) in a cross-functional remote team; optimized front-end performance and integrated third-party APIs.

PROJECTS

- **Tokopaedi — E-commerce backend** (Jan–Dec 2024): high-throughput backend on **Fastify + TypeScript**, <50ms response targets, schema-based validation, **TypeORM** entity design, Service-Repository pattern.
- **TopUp Store — Game top-up platform** (2026): live production platform on **Go + PostgreSQL + Redis + Docker**. QRIS payments (Midtrans), Digiflazz H2H integration, WhatsApp notifications (Fonnte), webhook idempotency, exponential-backoff retry, Prometheus metrics, health/readiness probes, GitHub Actions CI/CD, multi-stage Docker build.

TECH STACK

- **Languages:** TypeScript, JavaScript, Go, SQL
- **Backend:** Node.js, Fastify, Express, RabbitMQ, REST APIs
- **Data:** MySQL, PostgreSQL, TypeORM, NoSQL
- **DevOps:** Docker, Jenkins, Grafana, Nginx, AWS, Linux, CI/CD
- **Frontend (familiar):** React.js, Next.js
- **Other:** bcrypt, JWT, unit/integration testing, Git

EDUCATION

Universitas Terbuka (Open University), Indonesia — Feb 2024 – Mar 2028

Bachelor's in Information Systems (Sistem Informasi) · GPA 3.60

PT. DumbWays Indonesia Teknologi — Jan 2023 – Jul 2023 · Fullstack Developer (bootcamp)

CERTIFICATIONS

- **English C2** (EF SET 71/100) · **Back-End Dev** (Coursera) · **SQL** (Udemy)
